Medford	1	7.1%	1,617
Moorestown	1	9.6%	1,352
Maple Shade	1	11.9%	1,143
Delran	0	7.4%	1,107
Lumberton	0	10.5%	927

NOTES:

- Data sources: NJ Department of Health and Senior Services and US Census 2000.
- Children are defined as those 6 years of age and younger.
- Mcg/dL. Unit of measurement for blood lead levels (BLL). A BLL test is the only way to determine if a child has been exposed to dangerous levels of lead.
- Number of unscreened children derived by subtracting the number of children screened from the total number of children living in the municipality (2007).
