Cape May City	1	11.7%	189
North Wildwood	1	18.2%	189
Wildwood Crest	1	21.3%	163

NOTES:

- Data sources: NJ Department of Health and Senior Services and US Census 2000.
- Children are defined as those 6 years of age and younger.
- Mcg/dL. Unit of measurement for blood lead levels (BLL). A BLL test is the only way to determine if a child has been exposed to dangerous levels of lead.
- Number of unscreened children derived by subtracting the number of children screened from the total number of children living in the municipality (2007).
